Packages Suspected of Containing Marijuana

Audit Report
Report Number
HR-AR-17-001
October 12, 2016
Background

The U.S. Postal Inspection Service’s narcotics program is intended to protect U.S. Postal Service employees at nearly 32,000 facilities from the dangers of handling packages containing illegal narcotics and ensuring public trust in the mail. The Postal Inspection Service conducts investigations of individuals attempting to use the mail for drug trafficking. In fiscal year 2015, the Postal Inspection Service seized about 34,000 pounds of marijuana from the mailstream.

When postal employees suspect a package contains marijuana or any illegal drug, they must inform a supervisor, and contact the Postal Inspection Service for guidance.

We initiated this audit to address allegations regarding postal employees’ handling of packages suspected of containing marijuana at seven post offices in the Capital Metro, Great Lakes, Pacific, and Western areas.

What The OIG Found

Postal Inspection Service and Postal Service officials did not... Specifically;

- The Postal Inspection Service instructed employees at four post offices to... In at least one instance, ...
Postal inspectors discretion. Further, post office personnel were not always sufficiently trained to provide additional security for packages suspected of containing marijuana.

Insufficient controls over handling and tracking packages suspected of containing marijuana from initial retrieval from the mail to final disposition increases the risk these packages could be lost, stolen, mishandled, or undetected. This could expose employees to harm or danger, foster criminal activity, adversely affect drug investigations and prosecutions, and negatively impact the Postal Service’s brand, and the integrity of the mail.

What The OIG Recommended

We recommended management implement a nationwide policy for handling, tracking, and providing additional security for packages suspected of containing marijuana to reduce the risk of these packages being lost or stolen; and develop training to ensure responsible personnel understand their roles and responsibilities.

Findings

The Postal Inspection Service’s narcotics program is intended to protect Postal Service employees at nearly 32,000 facilities from the dangers of handling packages containing illegal narcotics and ensuring public trust in the mail.

Introduction

This report presents the results of our audit of packages suspected of containing marijuana (Project Number 16YG001HR000). This self-initiated audit addresses allegations regarding U.S. Postal Service employees’ handling of packages suspected of containing marijuana at seven post offices in the Capital Metro, Great Lakes, Pacific, and Western areas. Our objective was to assess the Postal Inspection Service’s and Postal Service’s handling of packages suspected of containing marijuana. See Appendix A for additional information about this audit.

Postal Inspection Service and Postal Service officials did not always properly handle and provide additional security for packages suspected of containing marijuana at the seven post offices we reviewed. Postal Inspection Service procedures allowed. Although postal facilities were secured, employees, which placed these packages at risk for theft or loss. Specifically:

- The Postal Inspection Service instructed employees at four post offices to
  - by postal inspectors.
- Postal inspectors at another Post Office.
- Lastly, employees at three post offices for packages suspected of containing marijuana.

Summary

Postal Inspection Service and Postal Service officials did not always properly handle and provide additional security for packages suspected of containing marijuana at the seven post offices we reviewed. Postal Inspection Service procedures allowed

Suspected Packages Found in the Mailstream

The Postal Inspection Service did not always properly handle packages suspected of containing marijuana. Postal inspectors instructed Postal Service employees at the

- In addition, postal inspectors from the Post Office. These actions lowered the security and accountability of suspected packages.

1 Publication 52, Section 216, and Poster 205-B.
Postal inspectors placed packages suspected of containing marijuana at risk by instructing responsible officials at the Post Office; the Postal Inspection Service, and the postmaster suspected of containing marijuana to the Postal Inspection Service and to allow packages suspected of containing marijuana to be mailed by postal inspectors.

For example, in October 2015, Post Office employees discovered a suspicious package thought to contain marijuana and notified the Postal Inspection Service, as required, who told them to notify the postmaster. The employees postmaster reported the incident to the Postal Inspection Service, which stated it contacts the U.S. Postal Service Office of Inspector General (OIG) regarding this incident, as required, by reporting the incident to the mail theft task force at the International Service Center in Chicago, IL.

At the , the station manager stated they were instructed to . They were also instructed to . Postal Inspection Service officials in the stated they instructed officials at the Office of Inspector General (OIG) regarding this incident, as required, by reporting the incident to the mail theft task force at the International Service Center in Chicago, IL.

Postal Inspection Service officials in the Post Office. Post Office personnel stated that they found the package in the mail in late November or early December 2015, and notified Postal Inspection Service personnel, who, after the postmaster notified the OIG’s Office of Investigations.

These incidents occurred because of .

2 Postal Operations Manual (POM) Issue 9, Section 139.117, July 2002, updated with revisions through February 1, 2016.
3 Employee and Labor Relations Manual, Section 665.14, Reporting Violations, states that allegations of violations of postal laws by postal employees, including mail theft, must be reported immediately to the OIG.

---

Packages Suspected of Containing Marijuana From

Postal Inspection Service officials . Post Office personnel stated that they found the package in the mail in late November or early December 2015, and notified Postal Inspection Service personnel, who, after the postmaster notified the OIG’s Office of Investigations.
There are inherent risks that suspected packages could be lost or stolen when the Postal Inspection Service instructs postal employees suspected packages containing marijuana or postal inspectors suspected packages.

We reviewed Postal Service and Postal Inspection Service policies to determine whether the instructions provided sufficient information about employees’, supervisors’, and managers’ roles and responsibilities for handling and accounting for suspected packages containing marijuana. Our analysis revealed that

For example, Postal Inspection Service Headquarters’ guidance

Further, Postal Service Posters 205-B⁸ and 84⁹ only provide general instructions for responding to suspicious mail and unknown powders or substances; however, neither the posters nor Postal Inspection Service policy includes guidance for Post Office personnel to properly secure suspected packages containing marijuana. Lastly, the Postal Inspection Service’s divisions’ guidance also increased the risk of the theft and loss of suspected mail packages by instructing Postal Service employees to

9 Suspicious Mail or Packages, September 2006.
Table 1. Analysis of Postal Service and Postal Inspection Service Policies

In addition, management should establish controls such as [redacted], to mitigate those risks.

As a result of current procedures for postal inspectors to instruct responsible post office employees to [redacted], this could expose employees to harm or danger, foster criminal activity, adversely affect drug investigations and prosecutions, and negatively impact the Postal Service’s brand and the integrity of the mail.

Source: OIG analysis.
In our prior management alert, management developed standard operating procedures. For example, Postal Service Supply Management and Postal Inspection Service officials established a requirement. In addition, management required postal inspectors to monitor packages suspected of containing marijuana. Management also required Postal Inspection Service personnel to secure packages by the Postal Inspection Service. Similar procedures could be implemented at post offices and other postal facilities to strengthen controls for retrieving, mailing, monitoring, and tracking packages suspected of containing marijuana.

Securing Packages Suspected of Containing Marijuana

Although postal facilities were secured, personnel at the post offices did not provide additional security for packages suspected of containing marijuana. For example:

■ On January 27, 2016, we visited the and observed a broken lock on the accountable cage door where employees kept packages suspected of containing marijuana. Management was unable to explain why the lock was broken and also stated they were not aware of any procedures or training for securing packages suspected of containing marijuana. Management stated they replaced the lock and key to prevent unauthorized entry and implemented procedures requiring employees to record entry to the accountable cage holding packages suspected of containing marijuana.

■ On February 17, 2016, we visited the. The postmaster stated that he holds packages suspected of containing marijuana in his office, which is generally unlocked. The postmaster also stated that he was not aware of any procedures and did not receive training to secure suspected packages containing marijuana. During our audit, management implemented corrective action by requiring employees to secure suspicious packages containing marijuana in a room, where only the postmaster and lead clerk have access.

■ On February 18, 2016, we visited the. The manager stated that employees placed packages suspected of containing marijuana on the table in the manager’s office, which is usually open and unlocked. The manager further stated there were no policies or procedures to provide guidance and requirements for securing packages suspected of containing marijuana. During our audit, management implemented procedures to use the station’s registry cabinet to secure packages suspected of containing marijuana.

These incidents occurred because post office personnel were not always sufficiently trained on providing additional security for packages suspected of containing marijuana. For FYs 2013 through January 2016, we reviewed training records for managers and stand-up talk records for the seven facilities we visited. All seven facility managers completed dangerous goods and export compliance awareness training; however, the training did not provide specific information related to providing additional security for packages suspected of containing marijuana.

---

10 Postmaster stated they used an extra locking mechanism at the facility as a replacement.
Finally, there were no records of stand-up talks on suspicious mail being conducted at any of the facilities, as required.\textsuperscript{12} We also reviewed the contents of the Postal Service’s current stand-up talks and videos related to suspicious mail and none of the stand-up talks or videos addressed how to properly secure packages suspected of containing marijuana.

As a result of Post Office employees\underline{This could expose employees to harm or danger, foster criminal activity, adversely affect drug investigations and prosecutions, and negatively impact the Postal Service’s brand and the integrity of the mail.}

\textsuperscript{12} Management Instruction EL-810-2006-3, dated March 27, 2006, states that all employees must be trained periodically for handling suspicious mail and unknown powders or substances.
Recommendations

We recommend the chief postal inspector, in coordination with the chief operating officer and executive vice president:

1. Implement a nationwide policy for handling, tracking, and providing additional security for packages suspected of containing marijuana to reduce the risk of these packages being lost or stolen. The tracking should be comprehensive to include initial retrieval from the mail to final disposition and reporting all packages suspected of being lost or stolen and related employee misconduct to the Office of Inspector General.

2. Develop training to ensure responsible personnel understand their roles and responsibilities for identifying, handling, tracking, and providing additional security for packages suspected of containing marijuana.

Management’s Comments

Management partially agreed with the findings and recommendations.

Regarding recommendation 1, management stated that post offices are secure facilities and mail processing areas are not accessible to the general public. Protocols exist for admitting non-postal personnel to restricted areas for valid business purposes and postal employees, in general, are trained to ensure the integrity and security of all mail. However, management stated they will develop and implement internal nationwide guidance by October 1, 2017, for handling and tracking mail suspected of containing marijuana.

Regarding recommendation 2, management stated that procedures currently exist for handling mail suspected of containing marijuana. Suspicion that a mailpiece may contain marijuana is just that — the suspicion of a Postal Service employee, such as a clerk, carrier, or supervisor. Management also stated that, without additional attention, they cannot make a determination with respect to the contents of a mailpiece; however, they will continue to provide and, when necessary, develop enhanced training for employees who handle packages which one can reasonably suspect contain marijuana. Finally, management will review and revise, as appropriate, training policies with respect to postal facility security protocols and the security and integrity of the mail, by October 1, 2017.

See Appendix B for management’s comments in their entirety.

Evaluation of Management’s Comments

The OIG considers management’s comments responsive to the recommendations and the corrective actions should resolve the issues identified in the report.

These recommendations require OIG concurrence before closure. Consequently, the OIG requests written confirmation when corrective actions are completed. All recommendations should not be closed in the Postal Service’s follow-up tracking system until the OIG provides written confirmation that the recommendations can be closed.

Background
The Postal Inspection Service’s narcotics program is intended to protect Postal Service employees at nearly 32,000 facilities from the dangers of handling packages containing illegal narcotics and ensuring public trust in the mail. Its investigations target drug rings and attempts to illegally use the mail for drug trafficking. In FY 2015, the Postal Inspection Service seized about 34,000 pounds of marijuana from the mailstream.

When Postal Service employees encounter a package suspected of containing marijuana, they must

Based on the Postal Inspection Service’s assessment, location of the package, and postal inspector availability, the postal inspector will

The Postal Inspection service seized 34,000 pounds of marijuana in 2015.

Objective, Scope, and Methodology
Our objective was to assess the Postal Service’s and Postal Inspection Service’s handling of packages suspected of containing marijuana.

To accomplish our objective we:

- Reviewed applicable Postal Inspection Service and Postal Service policies and procedures.
- Conducted site visits and interviews at the Postal Service’s and the seven post offices listed below to understand the roles and responsibilities of personnel receiving, handling, tracking, and transporting marijuana found in the mail.
Conducted site visits and interviews with responsible Postal Inspection Service officials at the following four Postal Inspection Service field offices to understand their oversight roles and responsibilities:

- Assessed controls to monitor, track, and safeguard packages suspected of containing marijuana.
- Reviewed FY 2013 through January 2016 training records for managers at the seven facilities reviewed to determine if they received sufficient training to properly handle packages suspected of containing marijuana.

We conducted this performance audit from January through October 2016, in accordance with generally accepted government auditing standards and included such tests of internal controls as we considered necessary under the circumstances. Those standards require that we plan and perform the audit to obtain sufficient, appropriate evidence to provide a reasonable basis for our findings and conclusions based on our audit objective. We believe that the evidence obtained provides a reasonable basis for our findings and conclusions based on our audit objectives. We will discuss our observations and conclusions with management on September 28, 2016, and will include their comments where appropriate.

We assessed the reliability of information contained in the Postal Service’s Learning Management System by reviewing existing information about the data and interviewing agency officials knowledgeable about the data. We determined that the data were sufficiently reliable for the purposes of this report.
Appendix B: Management’s Comments

September 30, 2016

LORI LAU DILLARD
DIRECTOR, AUDIT OPERATIONS

SUBJECT: Packages Suspected of Containing Marijuana
(Report Number HR-AR-16-DRAFT)

Thank you for the opportunity to review and comment on the recommendations contained in the draft audit report, Packages Suspected of Containing Marijuana. Management partially agrees with the findings and recommendations associated with the draft report and will address each separately below.

OIG Recommendations

We recommend the Chief Postal Inspector, in coordination with the Chief Operating Officer and Executive Vice President:

Recommendation 1: Implement a nationwide policy for handling, tracking, and providing additional security for packages suspected of containing marijuana to reduce the risk of these packages being lost or stolen. The tracking should be comprehensive to include initial retrieval from the mail to final disposition, and reporting all packages suspected of being lost or stolen and related employee misconduct to the Office of Inspector General.

Management Response/Action Plan: Management agrees, in part, with this recommendation. Post Offices are, in the course of daily operations, secured facilities and mail processing areas are not accessible to the general public. Protocols exist for admitting non-Postal personnel to these restricted areas for valid business purposes. Postal employees, in general, are trained to ensure the integrity and security of all mail. The Postal Inspection Service will however develop and implement an internal nationwide guidance document for handling and tracking mail suspected of containing marijuana.

Target Implementation Date: October 1, 2017

Responsible Official: Inspector in Charge, Criminal Investigations Group

Recommendation 2: Develop training to ensure responsible personnel understand their roles and responsibilities for identifying, handling, tracking, and providing additional security for packages suspected of containing marijuana.

Management Response/Action Plan: Management agrees, in part, with this recommendation. Procedures currently exist for handling mail matter suspected of containing marijuana. Suspicions of mail matter containing marijuana are just that, suspicions made by various Postal personnel, including clerks, carriers and supervisors.
Without additional attention, when appropriate, a determination with respect to the contents of mail matter cannot be made. We agree, however, that Postal Service management and Postal Inspection Service personnel will continue to provide and, in appropriate circumstances, develop enhanced training for Postal Service personnel who handle packages reasonably suspected of containing marijuana. Training policies with respect to the security protocols for Postal facilities, as well as the security and integrity of mail matter, will be reviewed and revised, as appropriate.

**Target Implementation Date:** October 1, 2017

**Responsible Official:** Inspector in Charge, Criminal Investigations Group
